EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Kevin J. Heint on February 26, 2007.

The application has been amended as follows:

In claim 1, in line 2 before "panel including an inner panel" inserted --sheet metal--.

In claim 1, in line 3 before "thickness of the inner panel" inserted --nominal--.

In claim 1, in line 9 before "panel including an outer panel" inserted --sheet metal--.

In claim 1, in line 10 before "thickness of" inserted --nominal--.

In claim 1, in line 10 after "thickness of the outer panel" inserted -- , wherein the inner surface of the outer panel overlies the outer surface of the perimeter flange--.

Canceled claims 7, 8 and 10-14.

In claim 9, in line 7 after "thickness of the outer panel" inserted -- , wherein the inner surface of the outer panel overlies the outer surface of inner panel--.

In claim 9, in line 15 after "edge of the outer panel" inserted --and the inner

surface of the end portion overlies a portion of the inner surface of the peripheral flange--.

2. The following is an examiner's statement of reasons for allowance:

As to claims 1 and 9, Morefield (US 6,536,983) discloses the claimed reduced radius hem assembly with the exception comprising an inner sheet metal panel including an inner panel inner surface and an inner panel outer surface on opposite parallel sides that are spaced apart by the nominal thickness of the inner panel, the inner panel having an outwardly extending perimeter flange terminating as an end disposed in a first plane, the end having a thickness dimension that is less than the thickness of the inner panel, and a beveled surface located between and contiguous with the end and the inner surface; and an outer sheet metal panel including an outer panel inner surface and an outer panel outer surface on opposite parallel sides that are spaced apart by the nominal thickness of the outer panel, the outer panel having a peripheral edge comprising a bend portion, an intermediate portion, and an end portion, wherein the inner surface of the outer panel overlies the outer surface of the perimeter flange, wherein the intermediate portion is adjacent to the beveled surface of the perimeter flange and the inner surface of the end portion overlies a portion of the inner surface of the perimeter flange.

There is no teaching or suggestion, absent the applicants' own disclosure, for one having ordinary skill in the art at the time the invention was made to

modify the hem assembly as disclosed by Morefield to have the above mentioned elemental features.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael P. Ferguson whose telephone number is (571)272-7081. The examiner can normally be reached on M-F (8:00-5:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Daniel P. Stodola can be reached on (571)272-7087. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
